DISCLAIMER: FDA recognizes that, when alternatives, such as FDA-cleared face masks are unavailable, individuals, including healthcare professionals, might improvise Personal Protective Equipment. Our face masks are made with hemp flower extract and copper technology. Caution should be used as the capacity for protection is unknown.

POWERED BY  HEMP BLACK™

# 3D knit multilayer reusable fusion / FACE MASK

## FEATURES ANTIMICROBIAL COPPER TECHNOLOGY

Copper-embedded fibers offer continuous product protection against bacterial growth. Unlike topically applied solutions, this durable copper technology does not wash or rub off.

## ODOR NEUTRALIZING HEMP EXTRACT

Our patented process utilizes seed genetics, farms and manufacturing facilities in the United States to produce our full spectrum hemp extract. This extract, fused with advanced sustainable polymers, such as recycled polyester, creates a new proprietary technology of materials. The adaptive, strategically -engineered fiber derived from this process, HEMP BLACK™ / element, delivers odor neutralizing performance.

## MULTILAYER 3D KNITTING PROTECTION

The high-tech 3D manufacturing features lightweight construction and an optimal arrangement of fibers which enhances breathability and structure. This wrinkle-free composition produces no waste during manufacturing and retains shape wear after wear.

## REUSABLE & MACHINE WASHABLE

The copper and HEMP BLACK™ / element are embedded into the core of the fibers, providing lasting antimicrobial and odor neutralizing properties that do not wash or rub off and are strongest within the first six months with weekly washing.

## SEAMLESS FIT FOR COMFORT

The Ananda Health fusion / FACE MASK is produced with seamless stitch shaping that contours for a custom fit and features knit-in stretch straps for enhanced comfort.

## 100% MADE IN THE USA

Innovated in Philadelphia. Grown in Kentucky. Engineered and produced in North Carolina. Our controlled domestic supply chain allows for a fast turnaround and the ability to continuously improve the fit, function and design.
